

## Treatment Plan with Associated Fees:

### Post-Op Tooth Pain:

All dental procedures can create pain in your teeth. Some patients do not have pain before the procedure; however, the tooth becomes painful postop. Furthermore, if your restoration caused tooth pain, the tooth may require root canal or extraction to resolve the resultant tooth pain. The patient is responsible to pay for any root canals or extraction that become necessary.

Furthermore, cleaning procedures use scraping and ultrasonic devices to remove the tartar from your teeth. This is expected to cause sensitivity and pain. Historical periodontal disease bone loss, root exposure, gum recession and bruxism make the teeth more sensitive. We do not take responsibility for your post-op tooth pain. Please get second opinion from Dr. Charles Fields Periodontist in Reston VA.

### Insurance:

This is just an estimate, not a guarantee of payment by your insurance company. All payments are due at the time of service for any procedure the patient desires. In the event that your insurance pays less than the estimated portion, then you are responsible for the full balance. This estimate is subject to change 3 months from today.

### Dental Anesthesia:

Anesthesia can cause adverse reactions including epinephrine reaction, palpitations, loss of consciousness, heart attack, stroke, aneurysm, nerve injury (including permanent facial nerve paralysis) and even death. You accept these risks if you undergo dental anesthesia. Please consult with your physician if you are unsure about this decision.

-Block injections can lead to permanent nerve injury with permanent pain sensations in the upper and/or lower jaw/lip.

### No requirement to accept:

By signing this consent form the patient does not make any commitment to pursue the recommended therapies listed below. By signing this consent form the patient simply acknowledges that he/she is aware of the recommended therapies in addition to their respective fees.

We cannot assess the restorability of your tooth until we remove the existing crown/filling/caries. After removal of the existing crown/filling/caries we will then make a determination if the tooth is restorable. The patient understands that sometimes we start a procedure such as crown/filling but determine intra-operatively the tooth is unrestorable.

Sometimes flossing contacts are impossible to achieve. These teeth will require crowns to provide the proper contours that allow for strong flossing contacts, otherwise food impaction will occur.

All patients grind their teeth at night and during the day. Bruxism will damage your teeth and your dental restorations. All patients are encouraged to purchase and utilize a Night Guard. If you decline to purchase & regularly use night guard, then you should expect damage to your dental restorations.

We make no guarantees or warranties on the services, restorations or appliances we provide. We make no guarantees and we offer no refunds. Thus, night guards, retainers, restorations, dentures, implants, root canals and dental appliances are all subject to undesirable outcomes. We will not provide refund for undesirable outcomes. We charge our fees to cover our time, effort, materials and overhead expenses. We do not guarantee good outcomes and good fit. We offer only 1 free remake if the patient desires to attempt a remake. This "one time free remake of a appliance" is available only during the first 7 days after delivery of the appliance to the patient. Once the dental office attempts to deliver an appliance to the patient the patient has only 7 business days to request free remake of an ill fitting or imperfect appliance.

We do NOT provide any warranties or satisfaction guarantees on dentures. If you purchase a denture you must expect some fit problems, pain, discomfort and abrasion to your gums. Dentures are the cheapest and least performing option for missing teeth. Furthermore, denture relines are not guaranteed to improve the fit of your denture.

8 ceramic restorations will provide excellent cosmetics. Composite resin is NOT capable of providing excellent cosmetics. Dr. Gerard Marlin prosthodontist in DC is an expert, so we recommend second opinion there.

We provide zero warranty for longevity of restorations. Depending on your bruxism habit a restoration can break within just hours of placing. We charge full price to repair fractured restorations.

Allergy: You accept full responsibility for any allergy that you experience after dental therapy in our office. Night guards, restorative materials & other materials we use can cause allergy (including anaphylaxis with death). We offer no refunds due to allergic reactions. You are responsible for all financial costs of correcting your allergic reactions. Get allergist consult first before doing treatment with us.

The dental company is entitled to claim legal fees and lost wages incurred for any situation where legal action against the dental company is initiated and ultimately unsuccessful.
