

## **Rules about discount treatment plans generated by this dental office:**

Quote expires 365 days after its creation.

'X' indicates the patient portion for the indicated set of procedures and this represents a package deal.

This is a package deal and the patient can NOT expect any refunds or credits due to insurance payments.

If insurance pays towards some procedures that is not automatically sufficient to reduce the patient portion requirements.

Ultimately, we will follow the lower of the following two options for patient responsibility

(option 1) insurance EOB value for patient responsibility

or

(option 2) the discount treatment plan value generated by the dental office.

This is how we will determine the proper reconciliation for these special bundle package deals after selective insurance payments are received.

If the patient fee is lower according to insurance EOB values, then we will honor that.

Alternatively, if the patient portion is lower according to the discount treatment plan generated by the office, then we will honor that.
